

May 9

NCCC-170 and USSES members and participants,

The NCCC-170 website containing all of the available information about our project including copies of this year's meeting information e-mails can be found at

<https://sites.uark.edu/ncr170/>

Meeting information e-mails are added within a day or two after they have been sent to participants. The website may also be accessed from a link on the USDA NIMSS website that can be found at

<https://www.nimss.org>

The USSES (aka SCC13) project information can be found on that website as well.

A Doodle poll for ride sharing to this year's meeting will be setup later this week or Monday of next week.

Please let me know if you have any questions.
