Subject: RE: NCCC170 - 2017 Call for abstracts

Date: Wed, 26 Apr 2017 01:20:55 +0000 From: Nora Bello <nbello@ksu.edu>

Dear NCCC 170 members,

It was certainly great to see several of you at the 2017 Conference on Applied Statistics in Agriculture this past week in Manhattan KS. I am looking forward to further interactions and motivating discussions at our annual meeting in Elk River, Minnesota, next June.

To that end, I would like to remind the group that the call for abstracts is open. Please submit your abstract for technical talks to me. You may indicate the intended length of your talk, recognizing that we value and encourage time for discussion. I anticipate we will have some flexibility to allocate anywhere between 30 to 45 minute per talk/discussion. I would please like to have your abstracts by May 19, if at all possible.

Further information on our NCCC 170 meeting is available at http://www.uark.edu/misc/ncr170/meetinf17.htm .

For questions on logistical aspects of the meeting (hotel, flights, etc), please contact Neil Paton at Neil\_Paton@cargill.com < mailto:Neil\_Paton@cargill.com > .

Looking forward to seeing you all in June.

Best regards,

Nora
